

## Recover at Home

We sincerely believe that through home care services, recovery can be done right at the place where you are always comfortable, your own home. The place where your cherished loved ones are within your easy reach.

More and more physicians and health care professionals find that patients recover sooner and comfortably right at their own familiar surroundings. Compared to nursing home facilities, home care services are always accessible without the burden and worries of leaving the place you wish to remain.

## Recovery for All

At-HomeCare of CT, LLC believes that home care services must be provided to all types of clients who wish to stay at home regardless of their race, gender, sexual orientation, religion, status, language and health condition.

## Why At Home?

Home care services are much preferred because of some of the following reasons:

### ★ **Affordability**

Professional caregivers can provide high-quality services and an unmatched type of care without spending more.

### ★ **Personalized service**

Through home care, you can get 100% attention and care essential for your recovery.

### ★ **Family's Support and Participation to your Rehabilitation**

Your loved ones have the opportunity to take part in your rehabilitation. Aside from that, caregivers and family members will be guided and provided with the needed patient education.

### ★ **Improves your Independence**

Since you will be cared right at your home, maintaining your privacy and dignity is truly possible.

## Home Care Gives Peace of Mind to Your Family

Carefully screened and selected caregivers will serve you round-the-clock. Since caregivers are well-trained, insured and bonded, receiving quality care right at your home is truly possible. Whether you are in need of a personal care attendant or a loving companion, home care service is your first and ideal option.

To maximize your loved ones confidence, caregivers are required to undergo:

- ★ Personal Background Check
- ★ Criminal Background Check
- ★ Drug Testing
- ★ Medical Examination
- ★ Reference Validation
- ★ License/Certification Check

We always allow our staff to go through a series of trainings and caregiving seminars to successfully meet your needs at home. For us, your satisfaction and recovery are the things that really matter to us.

## Your Partner Towards Your Recovery

We know that it's not easy to achieve total recovery when you are alone. With **At-HomeCare of CT, LLC**, we will always make ourselves available for you because we know that your health and life are our top priorities. We are a first-rate home care provider who focuses on extending unequalled type of care in order for you to achieve better health and recovery right at your home.

### **Our Unique Approach to Your Recovery**

- ★ We serve compassionately.
- ★ We provide personalized and customized services
- ★ We recognize and respect your family's role to your rehabilitation
- ★ We conduct a preliminary home care assessment
